

PACK & PAWS CLUB APP - WE NEED THE LOGO IN HIGHER RESOLUTION

To: Pack & Paws Club (design/branding contact) **From:** Gabriel Bandeira — app development **Date:** September 12, 2026

What we have today

The only logo file we received is **100 × 100 pixels (a JPG)**. That is **10× smaller** than what the App Store requires, so the app icon and the store listing look **soft / blurry** on modern iPhones.

The app itself is finished and already in Apple's review. The icon is the **first thing every client sees on their home screen** — a crisp version makes the whole product look professional.

What we need (any ONE of these is enough)

Option	File	Notes
Best	The vector original	.svg, .ai, .eps or .pdf — we can generate every size perfectly
Good	PNG, 1024×1024 px or larger	<i>For the app icon: solid background</i> , no transparency, no rounded corners (Apple applies the rounding itself)
Good	PNG, 1024×1024 px or larger, transparent	For the in-app screens (splash / login)

If you have both a background version and a transparent version, please send **both**.

Also helpful (optional)

- The **wordmark** “PACK AND PAWS CLUB” as a separate file (we sometimes show it without the shield)
- Any brand guide / color codes (hex) you already use, so the app matches your printed material

How to send

Any file-sharing link is fine (Google Drive, Dropbox, WeTransfer) — or just reply with the file attached. **Please send the original file, not a screenshot or a picture of the logo.**

Where it usually lives

Your designer, your print/branding supplier, or the original brand kit. Even the source file from your website's designer works.

Once we have it, we regenerate the app icon, the splash screen and the store listing image in a few minutes, and ship them in the next version (1.1).
